## SUMMARY

---

Product Designer with a background in UI/UX, graphic design, and frontend development. Experienced in designing and building digital products, from defining user flows and interface systems to developing production-ready web applications. Skilled in translating product ideas into clear, functional, and scalable experiences, with hands-on experience using Figma, React, Next.js, Vite, and TypeScript.

## EDUCATION

---

### Universitas Padjadjaran

Aug 2021 - May 2025

*Russian Literature, Faculty of Cultural Science, IPK 3.70*

- Design & Creative Activities: Contributed as a Graphic Designer across 14+ university organizations and activities, creating digital content, visual communication materials, and campaign assets.

## WORK EXPERIENCE

---

### Kementerian PANRB - Maganghub Kemnaker Batch II

Nov 2025 - May 2026

#### *Front-end Developer*

- Built an end-to-end government web platform (Admin Dashboard & CMS) using **Next.js, React, TypeScript, and Tailwind CSS**.
- Designed user flows, wireframes, and interactive UI prototypes in **Figma** before frontend implementation.
- Developed responsive and reusable UI components optimized for desktop and mobile devices.
- Worked with backend developers to integrate APIs and deliver functional web features.

#### *UI/UX Designer & Social Media Specialist*

- Designed end-to-end user journeys, wireframes, and interactive prototypes for government digital services.
- Built high-fidelity frontend prototypes and deployed them through **Vercel** for stakeholder reviews as MVP.
- Led branding, visual communication, social media design, and copywriting for the **ministry's digital channels**.
- Planned content strategies and visual systems to **improve consistency** across digital platforms.

## PROJECTS

---

### Sequel - AI Powered Design Clone [[Link Website](#)]

Designed and built an AI-powered creative platform that helps brands and creators generate social media visuals while maintaining consistent visual identity across content.

- Designed guided creation flows, **Visual DNA extraction**, and a canvas-based editing experience to reduce reliance on manual prompting.
- Built the product with **AI image generation, reference analysis, side-by-side comparison, and in-canvas editing** for a continuous creative workflow.

### Nemu - Design Analysis App [[Link Website](#)]

Designed and built a visual intelligence tool that helps designers understand and reuse the design characteristics of visual references.

- Designed an analysis workflow that transforms a reference image into structured **Visual DNA**, including style, typography, color, composition, and visual characteristics.

- Created interactive tools such as **font testing, color analysis, AI prompt generation, and asset export** to turn visual research into an actionable design workflow.

### Thumora - AI Thumbnail Generator [[Link Website](#)]

#### AI-Powered Thumbnail Creation Platform

- Built an AI-powered platform that turns video concepts into production-ready thumbnails through prompt-based image generation.
- Developed end-to-end with **React, TypeScript, Express, MongoDB, and Cloudinary**.

### Saldo - AI Money Tracker [[Link Website](#)]

#### Smart personal finance tracking application

- Built an AI-powered money tracker that lets users record expenses and income naturally through **text or voice**, with automatic categorization, account detection, and transaction parsing.
- Developed end-to-end with **React, Node.js, Express, MongoDB, OpenRouter, and Web Speech API**, including financial insights and spending forecasts.

### Government Web App

#### Official Government Platform

- Built the frontend of an integrated **government digital ecosystem** consisting of a public website, internal Management System, and request features.
- Worked closely with a backend engineer to connect the UI to a **Node.js/Prisma** and **MariaDB** backend using Next.js Server Actions.

## SKILLS and COMPETENCIES

| <b>Tools</b>          | : Git, GitHub, Figma, Vercel, VS Code, Postman                                                                                  |
| <b>Frontend</b>       | : React, Next.js, Vite, Tailwind CSS, Framer Motion, Shadcn UI, TanStack Query                                                  |
| <b>Backend</b>        | : Node.js, Express.js, REST API, Prisma, Server Actions                                                                         |
| <b>Database</b>       | : MariaDB, MongoDB, MinIO                                                                                                       |
| <b>Certifications</b> | : Hactiv8 React Front-End Developer (MSIB), Final Score: 89.91/100 , TOEFL ITP (Score: 501), IBM Certification.                 |
| <b>Languages</b>      | : JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL (Basic), Fluently Indonesian, English Conversational and Beginner in Russian. |

## ORGANIZATIONAL & DESIGN EXPERIENCES

---

### Festival Rusia 2023

Jul - Nov 2023

#### Creative Media and Design Lead

- Led the visual design for a faculty-scale event, including **visual identity, digital assets, and promotional materials**.

### Himpunan Mahasiswa Sastra Rusia

Jan 2022 - Jan 2024

#### Creative Media Lead

- Led the creative team in developing the organization's **visual identity and digital design system** across social media.
- Introduced AI-assisted tools to streamline **content creation and creative workflows**.
- Coordinated creative production across teams to maintain **consistent visual communication**.
